PES University

Department of Computer Science and Engineering

Database Management System

Aug- Dec 2026

Experiential Learning Level 3 - MiniProject Evaluation Criteria

#	Criteria	Distribution	Marks
1	Database Design	ER diagram (2), relational schema with keys, relationships, and constraints(3)	5
2	Database Creation	SQL database implementation-DDL with constraints (4), NoSQL/Vector database creation(4), Technology justification (1)	9
3	SQL Operations and Queries	DML operations (4), Nested/correlated/Recursive Queries , Join SQL queries(4)	8
4	Advanced Database Concepts	Advanced database concepts(Procedure/function, trigger, CTE (6), NoSQL/Vector feature RUD (7)	13
5	Web Application and Database Integration	Next.js interface (3), Backend/API and database integration (2)	5
6	Authentication and Authorization	Authentication implementation (front end and Minimum two roles and role-based access control in database (4)	4
7	Documentation, Git/GitHub, Demonstration, Testing, and Originality	Documentation, Git/GitHub (2), Originality and individual contribution (4)	6
		Total marks	50

Rubrics for Evaluation

#	Evaluation Component	Max. Marks	Correct Execution	Partially Correct	Absent / Incorrect
1	ER diagram (2)	2	2	1	0
2	Relational schema with keys, relationships, and constraints(3)	3	3	2	0
3	SQL database implementation-DDLwith constraints (4)	4	4	3	0
4	NoSQL/Vector database creation(4)	4	4	3	0
5	Technology justification (1)	1	1	0	0
6	DML operations (4)	4	4	3	0
7	Nested/correlated/Recursive Queries, Join SQL queries (4)	4	4	3	0
8	Advanced SQL concepts(Procedure/function, trigger, CTE (6)	6	6	3	0
9	NoSQL/Vector feature, RUD (7)	7	7	4	0
10	Next.js interface (3)	3	3	2	0
11	Backend/API and database integration (2)	2	2	1	0
12	Authentication implementation (front end and Minimum two roles and role-based access control in database(4)	4	4	3	0
13	Documentation, Git/GitHub (2)	2	2	1	0
14	Originality,individual contribution, Modification/Viva (4)	4	4	2	0
	Total Marks	50	50	31	0
